Foreign performance site issue in eSNAP

It has been reported that there is a system glitch in eSNAP when a foreign performance site is involved. In particular, the eSNAP system fails to validate and shows an error message that indicates a Congressional District entry must be added for the foreign entity. If this happens, follow these steps to add a 00-000 Congressional District which will allow the application to validate and process:

1. Select the country you need from the drop down
2. Select a different country from the drop down, the 00-000 will auto fill
3. Re-select the correct country, the 00-000 will set and remain filled in
