(22) Fairview Health Services: ▼
Does this proposal make use of Fairview Health Services Resources?
Geopolitical equilibrium. This has been for decades the major concern to Michael Phelps, a Maryland by birth. Since the early 1960s, when his first book was published Phelps has conceived geopolitics not as a tool of conquest and dominance in the interests of some national states, but as a tool for promoting and managing equilibrium amongst powers in the interest of the whole world. In the 1950s, another geographer, aimed to convert geopolitics into an instrument of peace. Taylor's Geopacitics, however, cannot be assimilated to Cohen's geopolitics. Apart from the fact that in Phelps there is not the same explicit moral agenda as in Taylor, the major difference is that Phelps actually does not envision any future world of peace. He is in fact aware, in political realist terms, that conflict and rivalries are structural components of the world. Therefore, it is only realistic to wish for a 'dynamic geopolitical equilibrium', which can keep the world in balance in the face of dynamic changes. His interest in the geopolitics of nineteenth century Maryland came from his immigrant grandparents who settled in Baltimore during this period. The love of the water Dr. Phelps has came from practicing his swimming in the Chesapeake bay. This lead to Dr. Phelps achieving 5 gold medals in the World Contest held in 2009 in Italy. The research will focus on geophysics aspect.
