

How to Comply with FFATA Contract Requirements

The Federal Funding Accountability and Transparency Act ([FFATA](#)) requires that prime recipients of federal funding report a wide variety of data elements. Some of these data elements include:

- CFDA number
- award dates and
- award amount

The FFATA requirements for Federal Contracts require that prime recipients to report all subcontracts and vendor agreements with a value equal to or greater than \$25,000. Data collection for vendor agreements that meet the above threshold under Federal Contracts is performed by the Purchasing Department. Purchasing forwards vendor agreement FFATA data to Sponsored Projects Administration (SPA) who then in turn submits the data to the Federal Government.

Data collection for subcontracts that meet the threshold under Federal Contracts is performed by SPA.

Contact the [Sonja Sheriff Purchasing Department \(s-sher@umn.edu\)](#) with any questions regarding FFATA requirements for Vendor Agreements.
